PCORE Announces The Release of Catalog 2.0

LeRoy, NY — PCORE Electric Company, Inc. announced today the completion of their new product catalog – Catalog 2.0.

The new catalog promises to expand upon the information that was available in the previous version; including new space dedicated to PCORE's Aluminum Test Terminal and PCORE's CSA/EEMAC bushing series.

"PCORE has always taken pride in putting out quality publications that are beneficial to our customers", said Tony Wiechec, Product Manager for PCORE Electric. "We believe that we've continued that tradition by updating our catalog to include new information regarding our company and product line. We feel that these additions are important to our customers and provide more evidence that PCORE has '*The Power To Serve*'".

PCORE provides apparatus bushings, related components, diagnostic services, and repairs to the electric utility industry and its equipment suppliers. Their range of products, includes 15kV-69kV PRC® Bushings, 25kV-500kV POC® Bushings, and 25kV GSU Bushings. PCORE's time and cost-savings products include the PCORE® Test Terminal, Bushing Repair Service and the Quick Link Bushing.

Designed and manufactured under the company's ISO-9001 Quality Program, PCORE products are applied around the world on power generators, transformers, circuit breakers, and substations.

PCORE's headquarters & manufacturing facility is located in Le Roy, New York, 25 miles southwest of Rochester. For more information about the company, please visit:
